PACKAGE OPTIONS

Each package has a different set of features

Evoko has developed award-winning room booking solutions since 2009. Our new Evoko Naso takes the room booking experience to a new level of simplicity.

While the Evoko Naso comes with a great suite of standard features and benefits, you can also upgrade by adding any or all of our package options. Varying package options are available to provide a workspace solution that's custom-tailored to your specific needs.

As Evoko builds both the hardware and software, we can guarantee best-in-class quality, security, and functionality. Paired with a seamless set-up process and our trademark intuitive interface, we offer next-generation simplicity.

THE EVOKO NASO MOBILE APP

The Naso mobile app takes the room and desk booking experience to a new level of simplicity

Automated check-in

With bluetooth low-energy check-in, users are automatically checked in to meeting rooms.

Find a colleague

Collaborate with co-workers by finding a colleague's booked location.

Floor plans

With floor plans and location mapping you will never get lost again.

Location preferences

Set your preferred location & floor. When searching for desks, preferred locations will appear first.

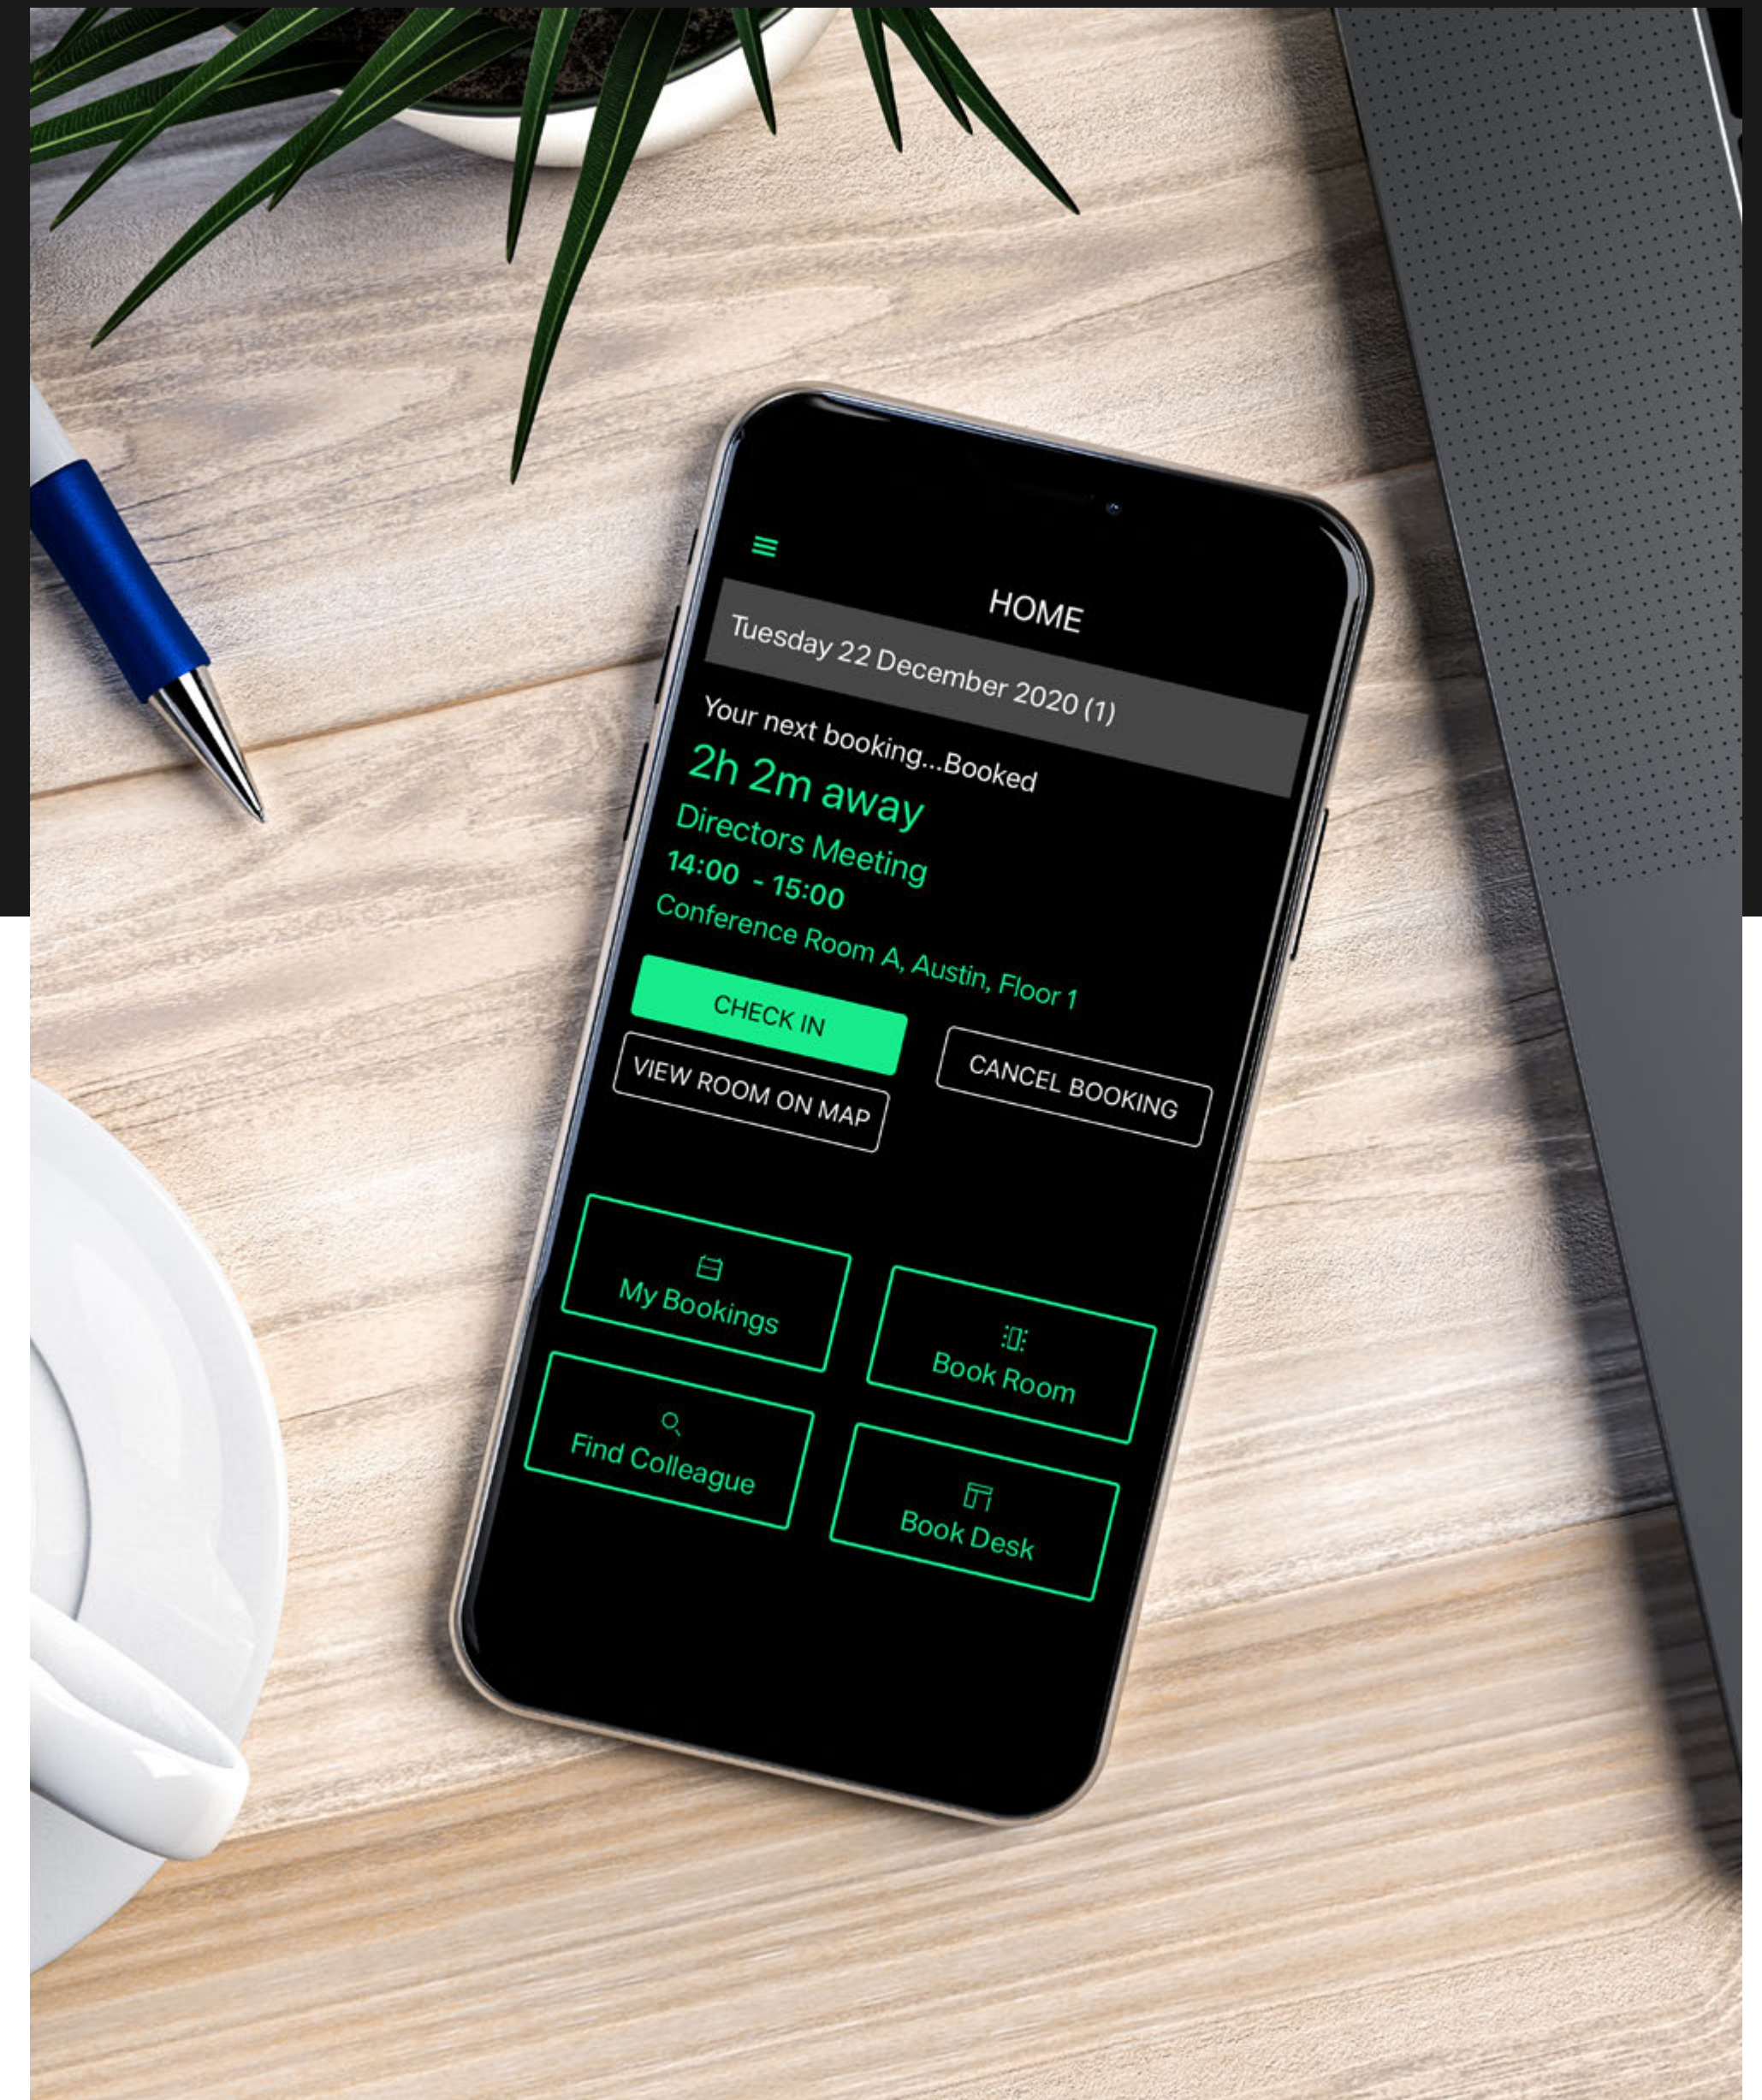

Notifications & alerts

Real-time notifications and reminders for bookings, check-in, and cancellations for no-shows.

Manage bookable desks

Depending on your needs desks can be booked in advance or simply arrive at an available desk.

RETURNING TO WORK

Social Distancing + Contact Tracing in the Workplace

With a suite of new features, Evoko Naso provides flexible, configurable solutions to support a safe transition back to the workplace.

- HOT DESKING AND AGILE DESK BOOKING
- NO-TOUCH MEETING ROOM EXPERIENCES
- VISITOR MANAGEMENT AND CONTACT TRACING
- REAL-TIME DATA INSIGHTS

HOT DESKING & AGILE DESK BOOKING

Fixed, bookable, and individually assigned desk management

With greater flexibility needed in managing desks while maintaining space management requirements, Evoko has developed a range of features to further enhance our existing capabilities and ensure a safe and efficient workplace environment. Whether you require the ability to assign fixed desks to employees, provide flexibility where people sit, or create bookable desks, Evoko Naso supports complete flexibility in desk configuration, with built-in intelligence that makes social distancing simple.

Assign a fixed desk

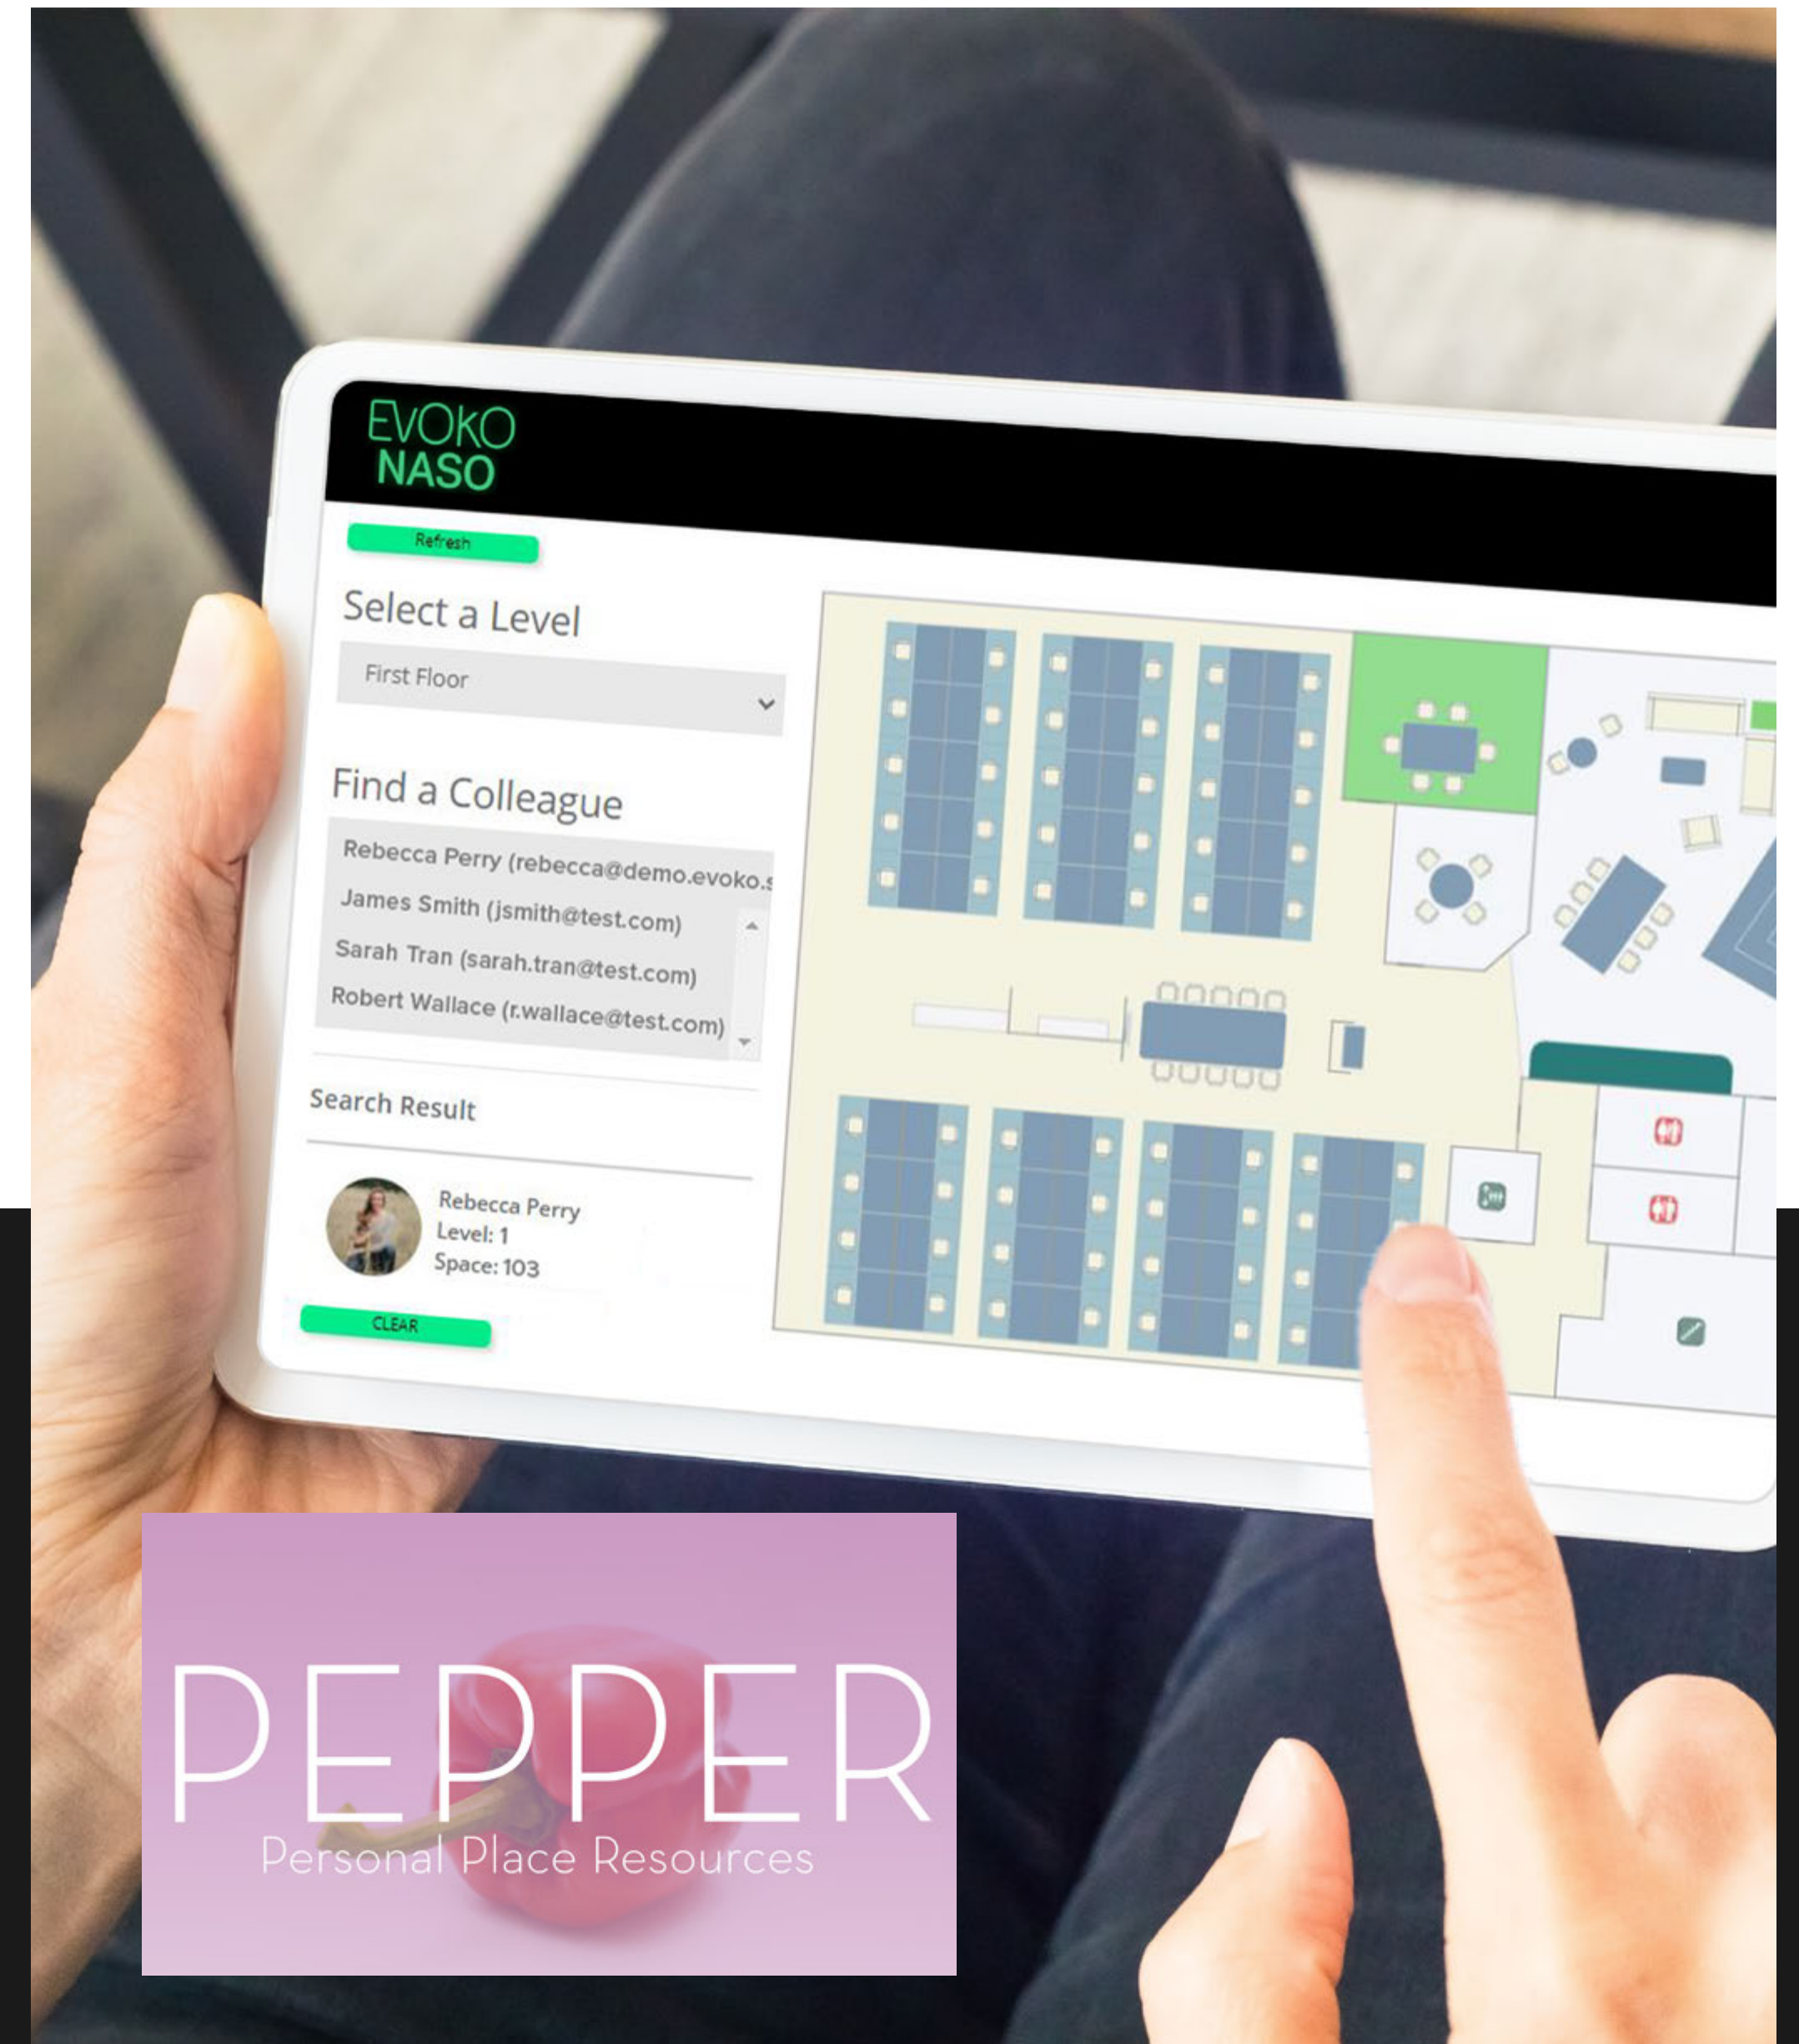

Identify who will be returning to the office and assign them a fixed desk that is only available for their use. Assigning a fixed desk can help with adherence to social distancing and providing employees with comfort.

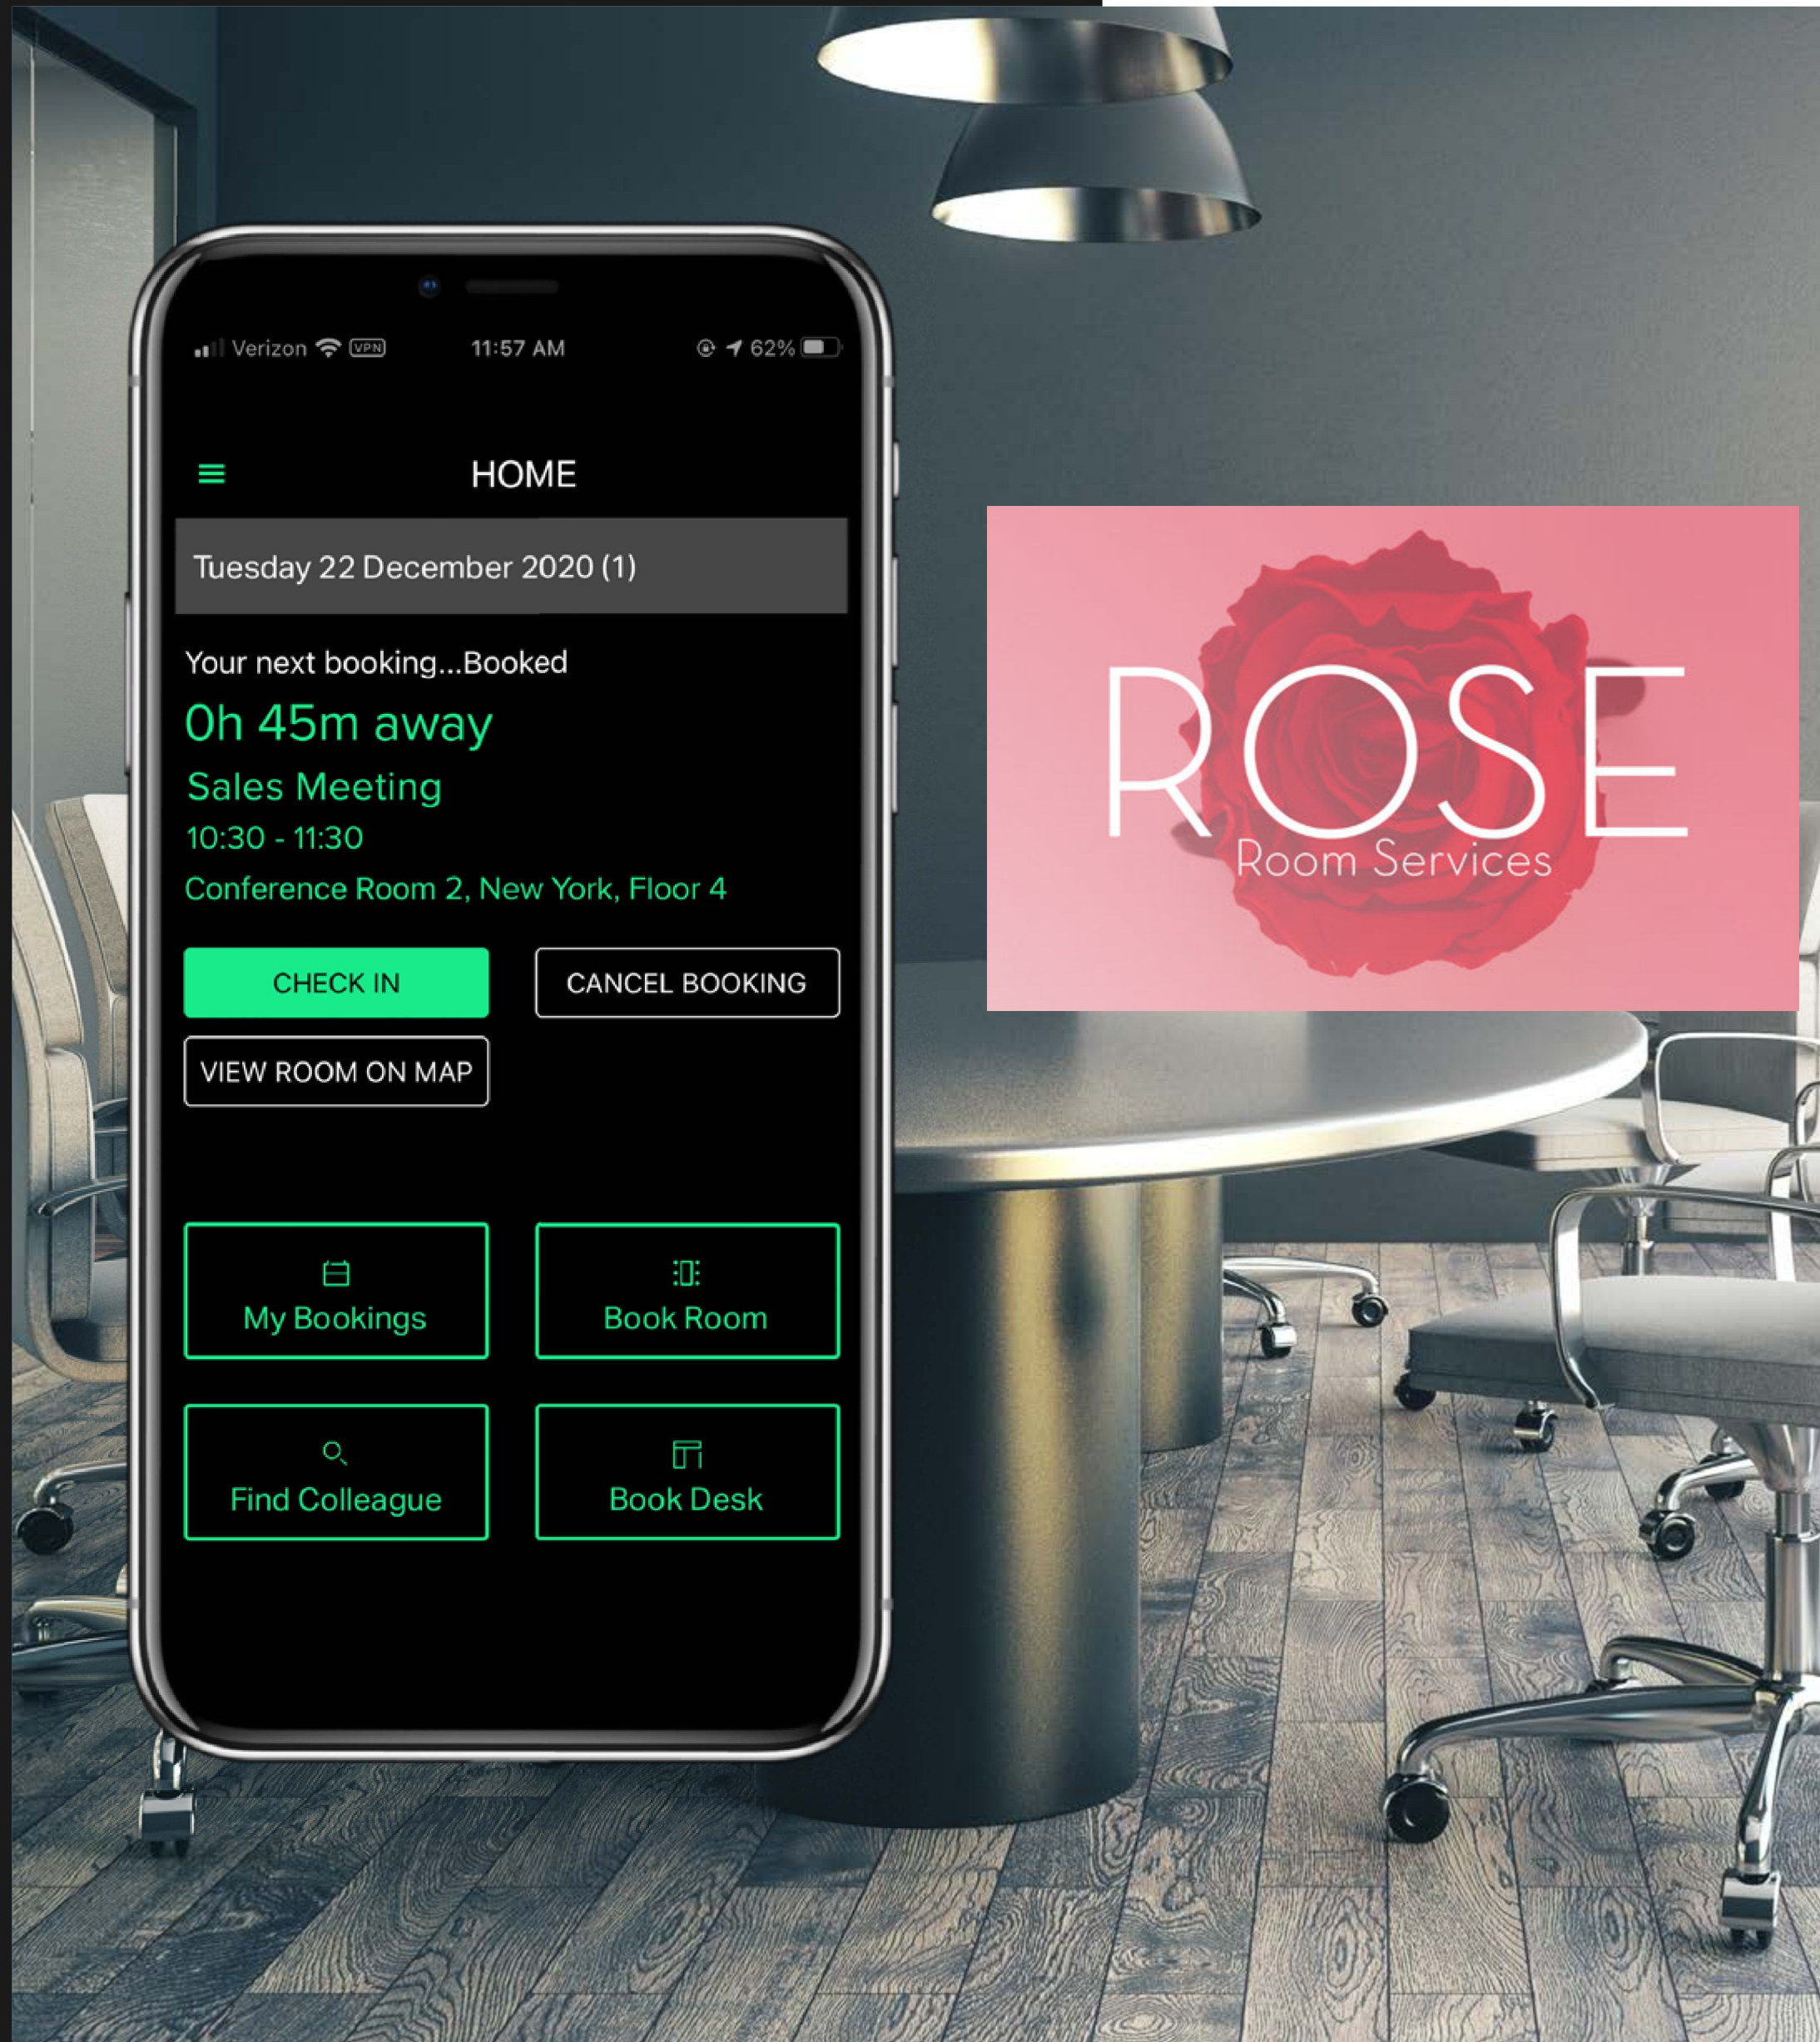

Define bookable desks

Pre-determine what desks can be used while enabling the flexibility for employees to choose their individual desk from available workstations. Using the mobile app, employees can also easily find a colleague with real time location mapping on your floor plan.

Ad hoc desk booking

With our integrated presence detection sensors placed at available desks, workstations are automatically made unavailable based on real-time occupancy and space management requirements.

NO-TOUCH MEETING

Navigate and Check-in/Check-out your way

With a variety of features to help employees and visitors find and check-in to meetings, Naso reduces the need to touch surfaces in the workplace.

Dynamic mapping

By using either static maps or interactive maps¹, users can easily navigate to rooms and desks.

Automatic check-in

Bluetooth will automatically check in the user, as a host or an attendee.

Manual check-in

Naso mobile app allows check-in by phone.

Sensor integration

Naso integrates with BlueCats and Kontakt.io sensors.

Built-in cleaning time

Built-in setup and tear-down time between meetings can be used for room cleaning, as well as other tasks and services.

Visible room status

Three distinctive 360 degree halo lights on panel visibly display the room status from a distance.

1. Requires interactive map license and Rose license

VISITOR MANAGEMENT & CONTACT TRACING

Application

The Guava app¹ interacts with your visitors to automatically identify them and notify the host of their arrival.

Pre-screening

Provide social distancing information and ask pre-arrival questions before guests arrive on site.

Contactless sign-in

Visitors can sign in on arrival using a given code.

Badge printing

Optional printing² of visitor badges with photos can improve security.

Dashboard analytics

Understand visitor behavior with detailed reports, including critical contact tracing information.

Real-time notifications

Alert hosts via email when visitors arrive.

Simple set-up

The Guava app is compatible with iPad for easy setup and quick deployment.

1. Coming soon
2. Printer not included

REAL-TIME DATA INSIGHTS

Evoko Naso provides real-time visual dashboards and exportable data reporting capabilities

The provided data insights helps the user to optimize the potential of the available meeting spaces. Reports provide an overview of all locations, users, and spaces, giving a snapshot of space utilization metrics including:

Bookable Desk Occupancy Insights

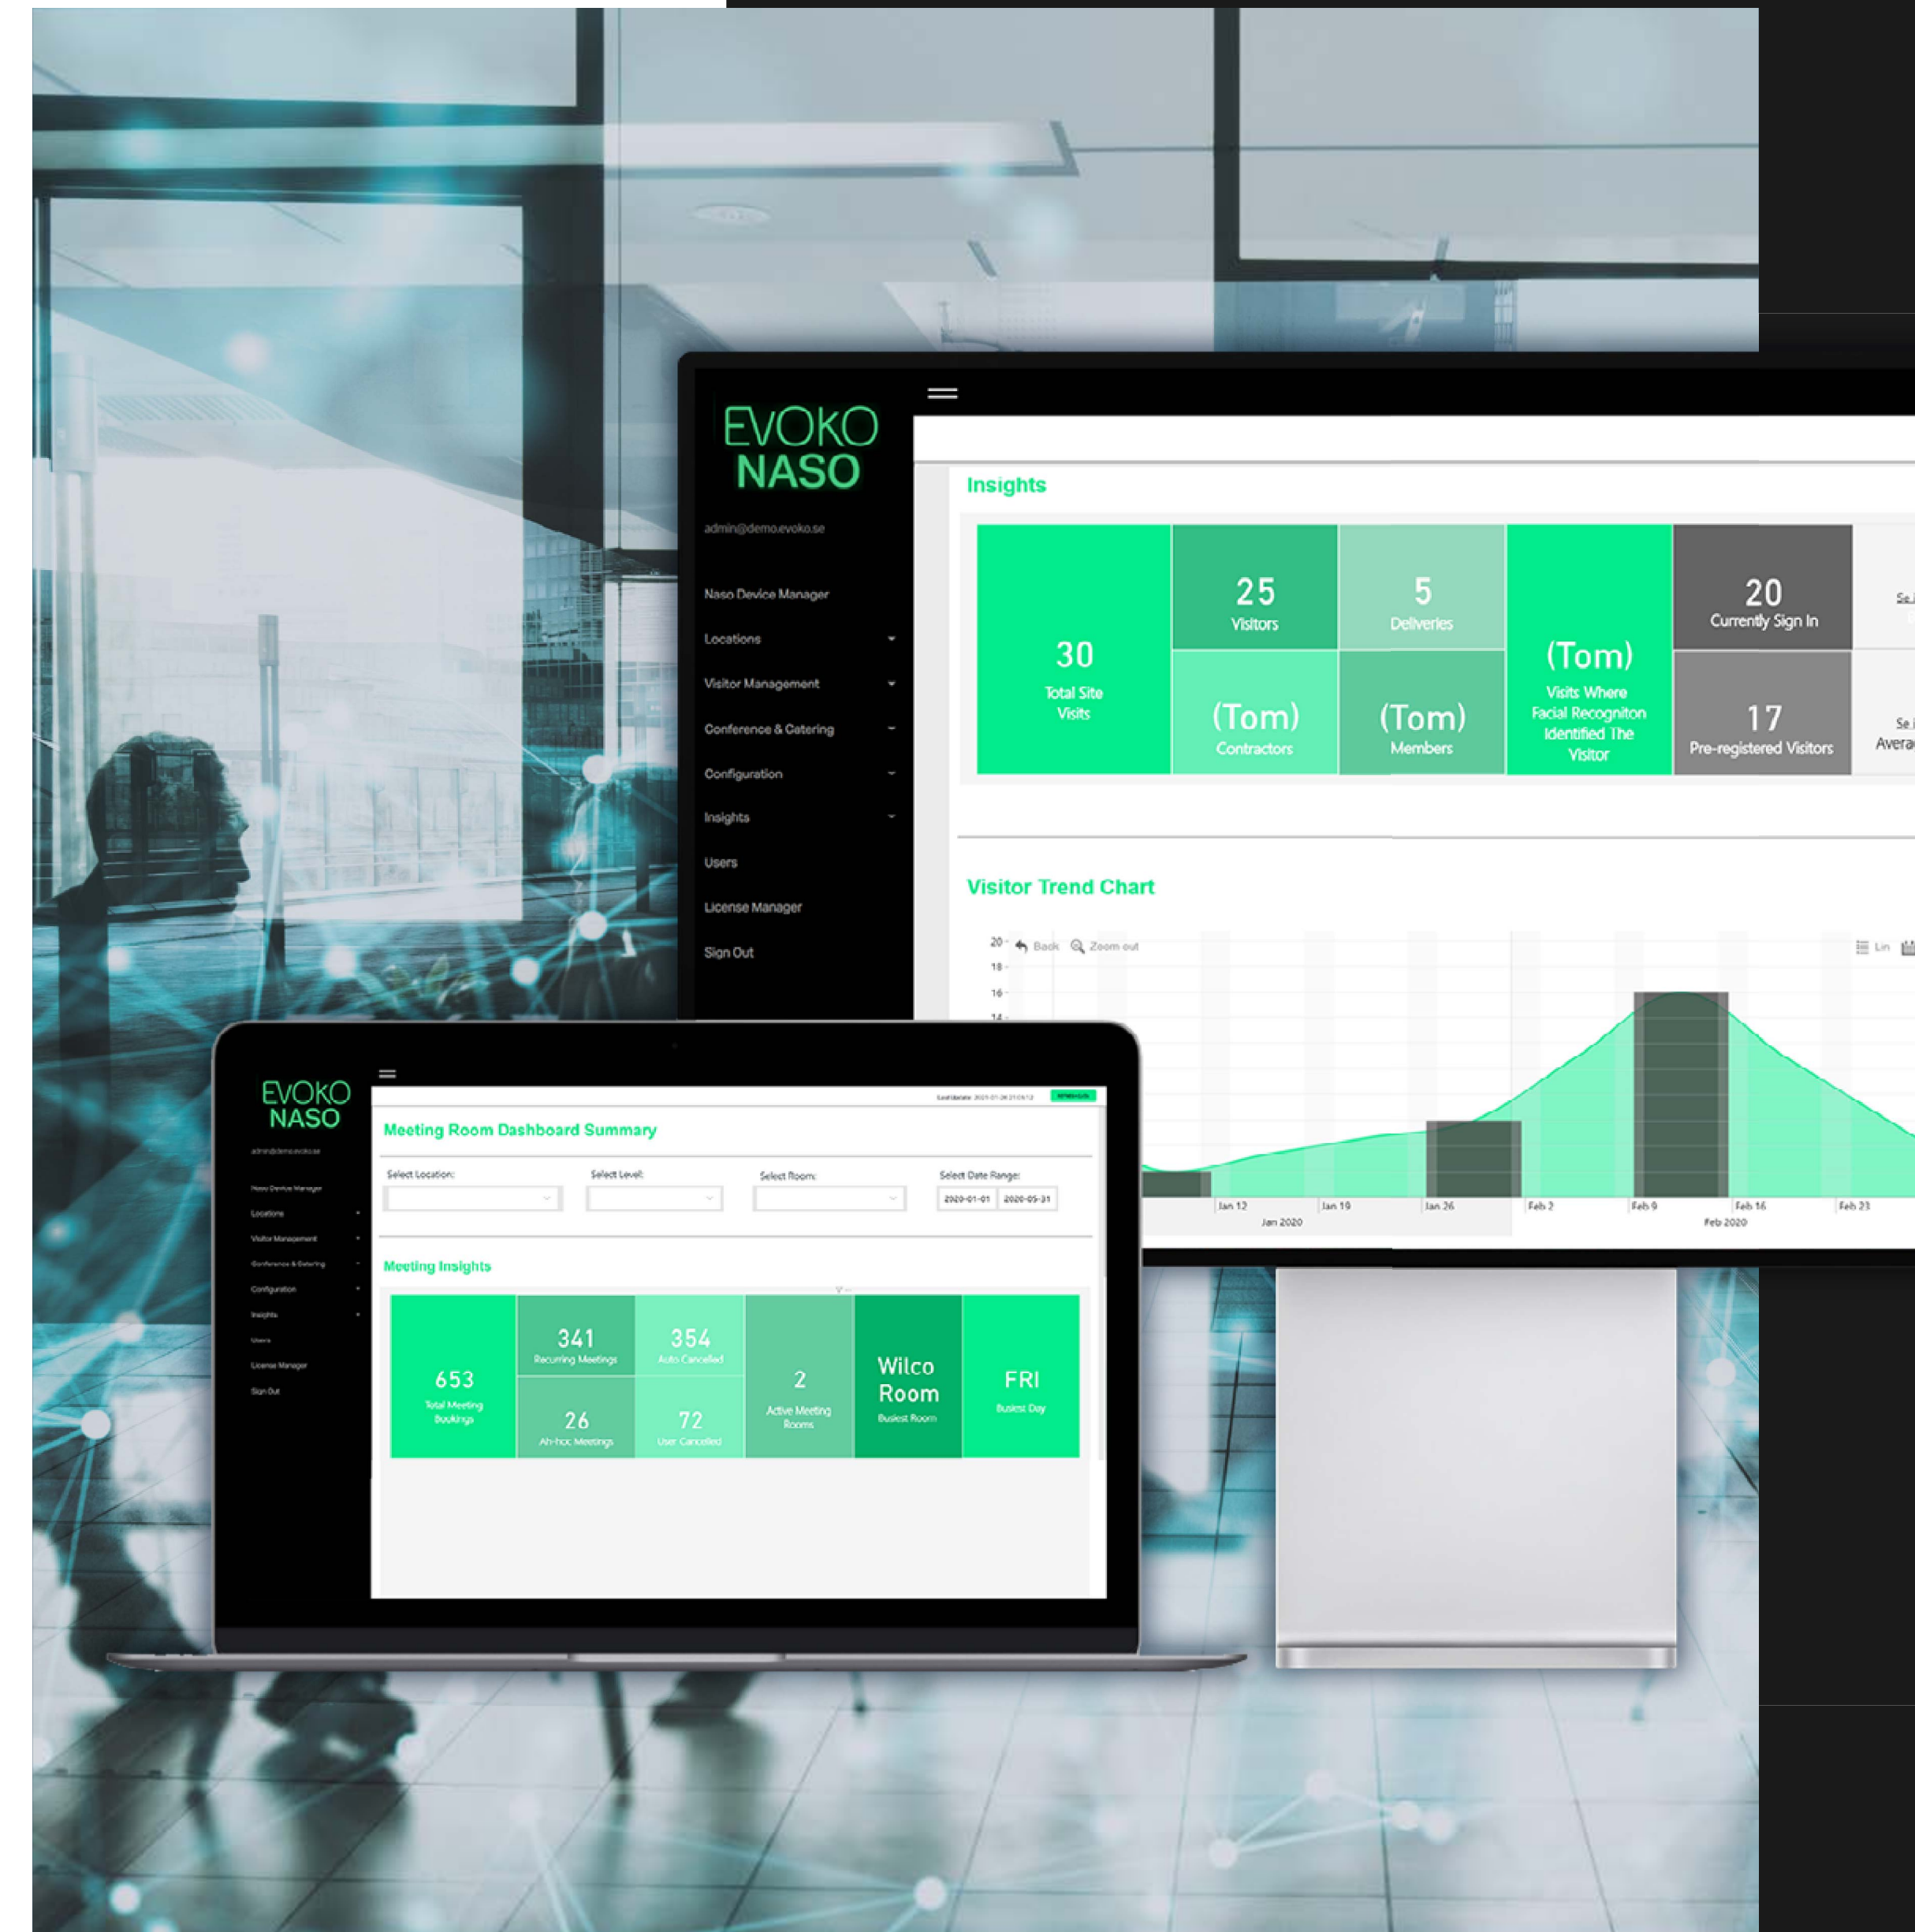

- Total number of active bookable desks
- Number of bookings created in period
- Number of bookable desks currently occupied (today)
- Busiest Desk
- Average Desk Occupancy Period (mins)
- Busiest Day

Meeting Room Insights

- Total Meeting Bookings
- Recurring Meetings
- Ad-Hoc Meetings
- Auto Cancelled
- User Cancelled
- Active Meeting Rooms
- Busiest Room
- Busiest Day

Visitor Management Insights

- Total Site Visits
- Visitors
- Contractors
- Deliveries
- Members
- Currently signed in
- Pre-Registered Visitors
- Average Visit Length
