Description:

This Dual-Bay SATA Docking Station offers standalone drive cloning that makes it easy to backup your data. Users can also connect it to your computer with the dock and swap your drives as your scalable storage solution.

Product Features:

- **SATA Compatibility:** Compatible with all 2.5"/3.5" SATA HDD/SSD with any capacity. Support SATA III/II/I. Allow you to work with 2 hard disks at the same time.
- **Optimize Hard Drives For Best Performance:** This Dual-Bay Docking Station supports UASP and TRIM. UASP enables faster data transfer to and from storage devices. TRIM can improve write performance, optimize the capacity of hard disk and enable it to last longer.
- **SuperSpeed File Transfer:** USB3.1 SuperSpeed + data transfer (up to 10Gbps).
- **Offline Clone:** Duplicates drives quickly without the need to connect to your computer.
- **Clone Status LED Indicator:** LED indicator to show the working process
- **Easy Installation:** -Plug and play, no driver required.
- **Compatible Systems:** Compatible with Windows XP/ 7/ Vista/ 8/ 8.1/ 10 (32/ 64 bit), Linux, Mac OS.
