Description:

This UNITEK Dual-Bay SATA Docking Station offers standalone drive cloning that makes it easy to backup your data. You can also connect it with your computer to dock and swap your drives as your scalable storage solution.

Product Features:

- **DAS/ Cloud Storage Center:** As a Direct Attached Storage, you can store or backup your memories or documents as a mega data center. With an FTP supported router, you can access your files anytime anywhere.
- **SATA Compatibility:** 2 SATA slots support 2.5" SATA III HDDs and SSDs up to 16TB in total (single max. 8TB).
- **LED Indicators:** It shows the working status of the disk and the progress of the offline clone.
- **UASP & SuperSpeed File Transfer:** It supports UASP for efficient data read/write, with SuperSpeed data transfer up to 5Gbps.
- **Standalone Hard Drive Duplicator:** It supports offline clone from source disk to target disk up to 60Mbps without connecting PC.
- **Remarks:**

- Please make sure that the capacity of target disk is larger or equivalent to the source disk.
- It only supports SATA interface and does not support IDE HDD
- S1105B has removed the internal fan from S1105A but it won't affect heat dissipation owing to its special design
