Description:

UNITEK DP 1.4 to HDMI 2.1 cable connects a computer, laptop, or other source device with DisplayPort to an HDTV/ monitor/ projector with HDMI output.

Product Features:

- **8K@60Hz Visual Feast:** This DisplayPort to HDMI cable supports resolution up to UHD 8K@60Hz and High-Definition Audio for a full range of audio types. It is the ideal tool for 8K game streaming or high-resolution video editing.
- **Active HDR :** Users can enjoy vivid photographs and videos with brighter colors and higher contrast than regular digital imaging provides.
- **Stream with HDCP2.3:** It allows you to broadcast Netflix, Hulu, Disney+, or other OTT contents which are digitally protected onto your monitor.
- **Dolby Atmos:** It supports flawless audio pass-through for uncompressed digital 7.1, 5.1, or 2 channels.
- **High Quality & Durable:** This nylon braided cable provides added durability. The premium aluminium alloy case aids heat dissipation. The high-quality connectors and the thick copper wire ensure stable & high-speed data transmission without signal loss.

Note: This cable is not bi-directional. It only works to convert content from DisplayPort to HDMI display.
