

EB8 4G **2K**

Pan & Tilt 4G Battery Camera

Make 360° protection mobile and reliable

Now, it's easier than ever to put security in action in the places you care about most. EZVIZ's newest camera overcomes installation limitations caused by networks or electricity. The EB8 4G is battery-powered with no strings – or cords – attached. It operates on 4G LTE networks in the outdoors where Wi-Fi may not be available. It also inherits key features from EZVIZ's popular outdoor pan & tilt predecessors to provide smart and reliable protection 24/7.

4G 4G Connectivity¹

 Device GPS Location Viewing²

 2K Resolution

 Panoramic View

 Extra-Large Battery Capacity (10,400 mAh)³

 Smart Human Motion Detection

 Two-Way Talk

 Color Night Vision

 Active Defense with Siren and Strobe Light

 Weatherproof Design

 Works with EZVIZ Solar Panel (Type-C Version) for Battery Charging⁴

 Supports MicroSD Card (Up to 512 GB) & EZVIZ CloudPlay Storage⁵

Made for the great outdoors

Wi-Fi and power can be a headache when it comes to outdoor protection. The EB8 4G changes the game by operating with a large battery and 4G network. The camera is weatherproof against rain and snow, and can stay charged using sunlight through a compatible solar panel.

4G Extended Connectivity with 4G LTE

 Weatherproof for the Outdoors

 Supports Charging via Solar, Green Energy⁴

Family Farms

Vacation Homes

Recreational Vehicles

Large Backyards

Renovation Sites

Warehouses

With 4G, it's portable & mobile

Wi-Fi coverage will no longer be a problem when finding that perfect location to install the EB8 4G. Just install the camera any place with a 4G LTE connection, and move it to another spot whenever you need.

Micro SIM Card

Nano to Micro Card Adapter Included

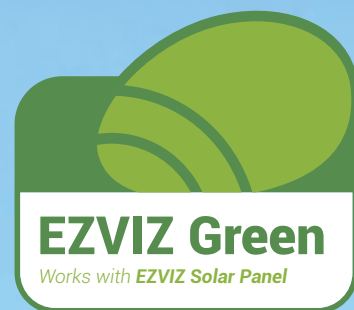

**The camera does not support using Wi-Fi network. A Micro Sim card and a cellular data plan is needed to use the camera. If you need to use a Nano SIM card, please use the included card adapter to convert it to the Micro size first.*

Check full list of supported regions and carriers [here](#).

Know where your camera is with the built-in GPS

Even if you lose your camera in the wilderness or the woods, it won't be lost thanks to the GPS locator function².

Large battery capacity, with eco-friendly charging options

The EB8 4G is 100% wire-free with built-in rechargeable batteries³. Going even further into the realm of sustainable green energy, this camera can be connected to an EZVIZ Solar Panel⁴ to harness the power of the sun.

A sharp, smart eye that goes around your property

01 Smarter detections for essential activities

The EB8 4G is designed to provide smart notifications on detected activities. You can set the camera to detect all kinds of motion – including running animals – or enable the smart human motion feature to auto-track human activities.

 Smart Human Motion Detection

 Auto-Tracking

 Customizable Detection Zones

FREE No Subscription Fee

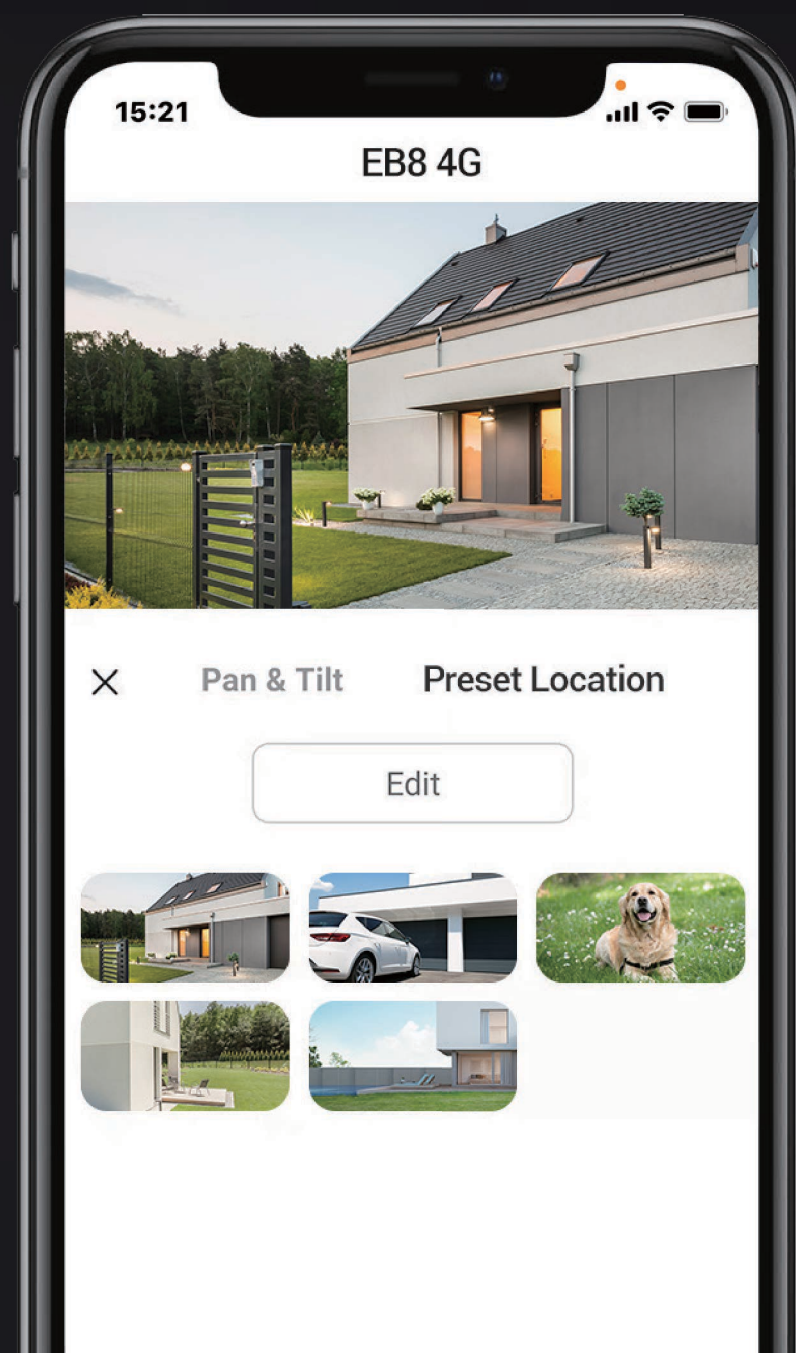

02 360° plus 2K, for far less blind spots

A bigger space needs a wider view, and that's where the EB8 4G comes in handy. It can pan and tilt to take in a 360-degree field-of-view, and render details in 2K resolution to capture crucial moments clearly.

03 One click return to the preset location

No matter how complicated the tracking is, the camera always knows its way back to your preferred viewing angle. You can pinpoint up to 12 angles via the EZVIZ App. Just click on your pre-set dots and the camera will automatically resume its place.

See every detail in color, from day to night

Black-and-white images are now history. The EB8 4G uses its built-in spotlight to restore the colorful beauty of its natural surroundings, even when it's late at night. It would be very difficult to sneak in under the cover of darkness with the EB8 standing guard.

A vigilant guard who works around the clock

The camera features an active defense function to provide an extra layer of protection. Upon detection of intruders, the camera will flash a spotlight⁶ to let uninvited visitors know they have been detected.

Speak to uninvited visitors using just your smartphone

Enjoy two-way communications by simply using your phone. Or, pre-record specific voice messages that automatically play when people are detected on camera.

Smart integration, hands-free control

Easily manage your EB8 4G via the EZVIZ App. What's better, you can voice-enable the live viewing with "Hey Google" or "Alexa" to check what's happening on a bigger screen.

Large, safe storage options that you can trust

You can secure your recorded videos on a local microSD card of up to 512 GB, or subscribe to EZVIZ CloudPlay for fully-encrypted cloud storage⁵.

Supports MicroSD Card

Supports EZVIZ CloudPlay Storage

Enhanced viewing pleasure with smaller video files

Compared to the prevailing H.264 video compression technology, H.265 creates a more fluid viewing experience with recorded videos. Meanwhile, you won't have to worry about large video files taking up too much of your storage space – H.265 technology reduces their sizes by up to 50%⁷.

50% ↓
Video Storage Space

50% ↓
Required Bandwidth

We do our best to protect data and privacy

EZVIZ has been awarded by DNV for **information security** (ISO/IEC 27001:2013), **personal data protection** (ISO/IEC 27701:2019), **cloud security** (CSA STAR) and more.

- 1 Please note that the EB8 4G camera only operates with a 4G network and does not work with a Wi-Fi connection. The list of supported regions and carriers is continually updated; please find the full list at ezviz.com.
- 2 The GPS function is able to run properly only when the camera is installed in an open, outdoor environment. If you install the camera in an indoor space inside a building, the GPS may not function properly.
- 3 The camera battery life may vary due to the stability and/or signal strength of network carriers, environmental factors, and the frequency of camera activities.
- 4 The solar panel is not included in the kit. Currently the EZVIZ EB8 4G supports connecting with EZVIZ's specific solar panels with type-C charging ports. Please verify compatibility before making a purchase.
- 5 Local storage cards must be purchased separately. Cloud storage service is only available in certain markets. Please verify availability before making any purchase.
- 6 The spotlight will not flash when the Color Night Vision mode is enabled.
- 7 Data from EZVIZ Lab's test results under standard conditions. The video compression efficiency will vary with the frequency and complexity of the activity captured, as well as other environmental factors.

Specifications

Model CS-EB8 (3MP,4GA)

Camera

Image Sensor	1/2.8" 3-Megapixel Progressive Scan CMOS Sensor
Minimum Illumination	0.01 Lux @(F1.6, AGC ON), 0 Lux with IR
Shutter Speed	Self-adaptive shutter
Lens	Viewing angle: 100° (Diagonal), 83° (Horizontal), 44° (Vertical)
PT Angle	Pan: 340°, Tilt: 65°
Day & Night	IR-cut filter with auto switch
DNR	3D DNR
Night Vision Distance	IR 15 m, Color Night Vision 15 m

Video & Audio

Max Resolution	2304 x 1296
Frame Rate	Max. 15fps; Self-Adaptive during network transmission
Video Compression	H.265 / H.264
Video Bit Rate	Quad-HD;Full- HD; Hi-Def. Adaptive bit rate.
Audio Bit Rate	Self-Adaptive
Max. Bitrate	1.5 Mbps

Function

Smart Alarm	Smart human motion detection
GPS	Supports
Two-way Talk	Supports
General Function	Anti-Flicker, Heart Beat, Password Protection, Watermark

Storage

Local Storage	Supports microSD Card (Up to 512G)
Cloud Storage	EZVIZ cloud storage

General

Operating Conditions	-20 °C to 50 °C (-4 °F to 122 °F), humidity 95% or less (Non-condensing)
IP Grade	IP65
Power Supply	DC 5V/2A (Adapter needs to be purchased separately)
Battery Capacity	10400 mAh
Power Consumption	Max. 10W
Product Dimensions	183 × 116 × 166 mm (7.20 × 4.57 × 6.52 inch)
Packaging Dimensions	216 × 145 × 203 mm (8.50 × 5.71 × 7.99 inch)
Weight	Net weight: 835 g (26.8 Oz) With package: 1072 g (34.4 Oz)

Features

Solar Charging Panel

Designed for EZVIZ Battery-Operated Cameras*

Connect your EZVIZ battery-powered camera to our Weatherproof Solar Panel to capture the sun's free, clean energy – and enjoy year-round security.

*Currently compatible with these models: CS-BC1C, CS-BC1-B1, CS-BC1-B2, CS-BC1-B3, CS-BC1, CS-C3A (Version C). The list of compatible models will grow as we launch new battery cameras. Please check for compatibility before purchasing.

Energy-saving and Eco-friendly Solar Power Supply

High Efficiency with Monocrystalline Silicon Cell Solution

Up to 6.18 W of Charging Power for a Long-lasting Supply

4-Meter Cable for Mounting Flexibility

IP65 Weatherproof Protection for Outdoor Use

Non-stop protection

Made of single crystalline silicon solar cells, the Solar Panel delivers up to **6.18 W** of power. It will max out on sunny days to make sure the battery camera has enough power to operate all day and night.

Non-stop protection.

Made of single crystalline silicon solar cells, the Solar Panel delivers up to 6.18 W of power. It will max out on sunny days to make sure the battery camera has enough power to operate all day and night.

Weatherproof protection

Featuring a durable frame and stainless steel screws, the solar panel easily withstands rain, dust, snow and sun. Just mount it, leave it, and enjoy the sun's continual power.

Weatherproof design.

Featuring a durable frame and stainless steel screws, the solar panel easily withstands rain, dust, snow and sun. Just mount it, leave it, and enjoy the sun's continual power.

Flexible installation.

With an adjustable bracket that rotates 360 degrees and a 4-meter-long cable, the Solar Panel offers incredible flexibility. Mount your security camera where you need it, then find a sunny spot to install the solar panel. With 4 meters (13 feet) of cable, you will get the flexibility you need for great security and continual power.

Up to 4 meters

03

Operation

1. Install the bracket

1 Install the bracket

- (For the cement wall/ceiling only) Drill screw holes, and insert three anchors.
- Use three screws to fix the bracket.

When drilling holes for expansion bolts, please make sure that the diameter of the drill head is 5.5mm to 6mm, and that the hole depth is not less than 25mm.

2. Install the bracket

- 2** Install the Solar Panel
- Mount the solar panel on the bracket.
 - Tighten the fixing screw.

3. Adjust the Angle

3 Adjust the Angle

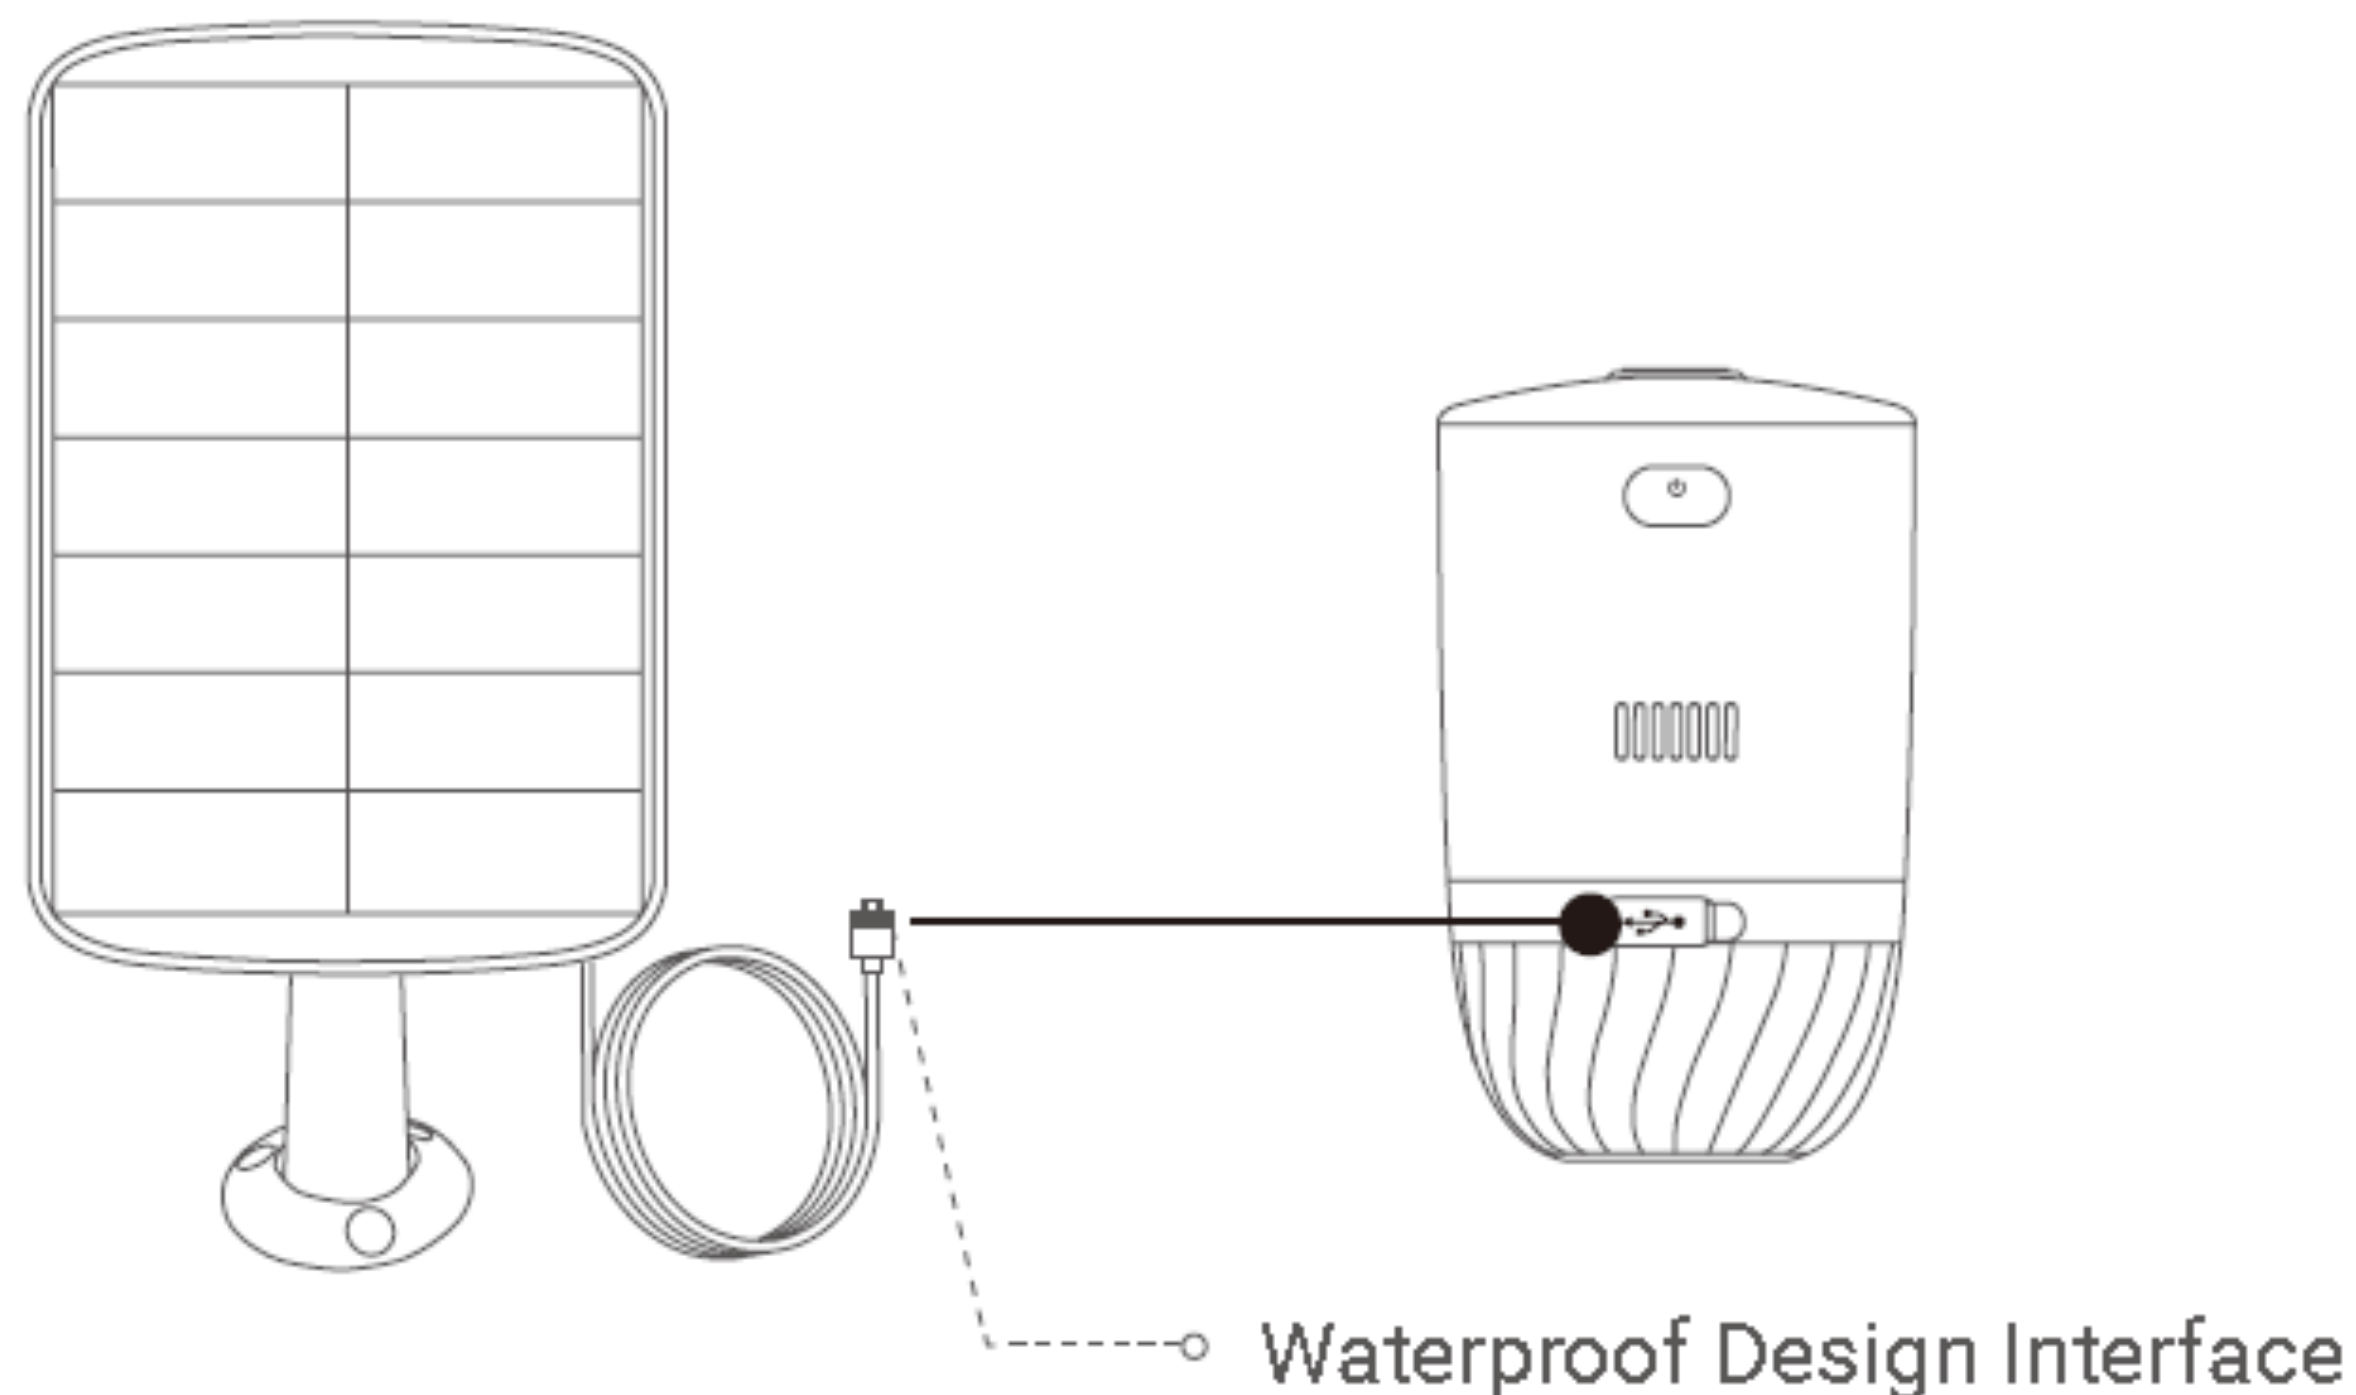

- Loosen the adjusting screw.
- Adjust the solar panel angle as your desired place.
- Tighten the adjusting screw when you have the solar panel in the position you want.

- i** • Please do not place the solar panel completely parallel to the ground to avoid dust or other dirt.
- The solar panel should be tilted to receive maximum solar radiation and the recommended tilt angle is 25°-40°.

4. Charge the Battery Camera

4 Charge the Battery Camera

- Connect it with battery camera.

- i** • In accordance with safety and regulatory requirements, the working environment temperature range for battery charging should be maintained at 0-45°C.
- For detailed information, please visit www.ezvizlife.com.
