

ActiveCool™ Cradleless
15W MagSafe
Compatible
Wireless Charger Mount

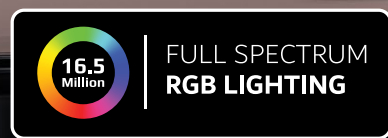

15°C Minimum Temperature

MagChill-GA

- Aluminum Alloy Radiator**
- Semiconductor Refrigeration Chip**
- Low Noise Cooling Fan**

Experience the pinnacle of convenience and safety on the road with our revolutionary 15W MagSafe compatible Charging Car Mount. This groundbreaking innovation introduces the world's first semiconductor refrigeration system, specifically engineered to tackle overheating in high-temperature environments. Benefit from rapid cooling of mobile phones by up to 15 degrees during charging, effectively mitigating common issues like high temperature protection or charging failures in hot car settings. Utilizing short-distance radio energy transmission via electromagnetic induction, our car mount enables Qi-compatible receivers to wirelessly charge at Fast Charge 15W max, ensuring efficient charging for a wide range of devices. In addition to its cooling prowess, enjoy quick alignment and secure mounting with N52 strong magnets and anti-shake design, guaranteeing stability on any terrain. Enhanced safety measures include Foreign Body Detection (FOD) technology, safeguarded by a smart chip against over-charging and overheating, ensuring a worry-free driving experience. Further versatility is offered through its cradleless 360° rotation and universal compatibility, providing unparalleled flexibility for hands-free driving. Elevate your driving experience with our innovative Charging Car Mount, designed to keep your devices cool, charged, and secure on the go.

15W MagSafe Compatible

MagChill-GA MagSafe compatible wireless charging car mount aligns with your smartphone and charges your compatible devices at 15W lightning speeds.

Quick Magnetic Alignment

Eliminate awkward fumbling with MagChill-GA, its perfectly aligned magnets swiftly and seamlessly snap onto your devices, ensuring secure attachment even during bumps and turns.

Enhanced Cooling Function

Introducing our cutting-edge Magnetic Car Charger featuring the first ever Semiconductor Refrigeration Cooling Function, keeping your device cool by up to 15 degrees during charging. Drive with confidence in any climate as overheating becomes a thing of the past. Enjoy uninterrupted charging on-the-go with revolutionary cooling technology built right into your car mount.

Anti-Shake Design

MagChill-GA comes with an Anti-Shake Design that ensures maximum steadiness, minimizing vibrations and movement to keep your device securely in place throughout your journey, providing a stable viewing experience for safer driving.

FOD for more Safety

With our (FOD) Foreign Object Detection Function, you can trust that your device and mount are protected against potential charging hazards, ensuring a safe and reliable charging experience.

Charge Securely

The onboard safety chip in MagChill-GA provides overcurrent, overheat, over-voltage, and short-circuit protection, so you can charge with confidence.

360° Cradleless Design

The cradleless design allows you to set your music in portrait mode or use the navigation in landscape mode with ease.

Specifications:

- Input: 9V/3A
- Wireless Charging Output: 5W/7.5W/10W/15W
- Efficiency: 78%
- Charging Distance: ≤3mm
- Wireless Charge Frequency: 110K~360KHz
- Refrigeration Power: 7W
- Fan Noise: ≤38dB
- Cable Length: 1.2m
- RF Output Power: <=20dBm

Packaging Content:

- MagChill-GA, USB-C to C Charging Cable, AC Vent Mount, Gooseneck mount, Metal Ring plate, Metal Ring Positioning tool, 4pcs PVC Stickers, User Guide.

Certifications:
