Virtual Immersive Sound

Haptic Vibration Feedback

Unidirectional Microphone

Sound plays a critical role when playing immersive games. It creates a lifelike experience that lets you truly experience your game character. The 50mm high precision drivers along with the vibration feedback, give you greater spatial awareness. We've also added ergonomic design features that make Python a must have for extended gaming sessions.

Features

- Maximum adjustability to fit seamlessly onto any head size and provide enhanced comfort

- The soft cushioning on the headband relieves any strain on your head while wearing the headset for extended periods

- Feel the game with sensory haptic technology that converts audio cues from the game into dynamic vibration feedback in real time.

- The finely tuned audio drivers product a surround sound effect that lets you react to any game movement if its coming from above or beneath you, giving you heighted senses.

- The HD mic ensures shotcalls and strategic discussions are delivered to your team with absolute clarity.
