SlimTap Ultra Light Wired Keyboard with 104 keys (T052AGY01-US, T052AGY01-US-AR)

Sleek design. Ultimate Comfort and a Natural Fit For Your Hands.

Description:

UNITEK SlimTap Ultra Light Wired keyboard with 104 keys, with its slim design, silent typing experience, and rich practical functions, is suitable for both office and entertainment scenarios. It brings you a stable and efficient typing experience.

Product Features:

- **Ultra Slim & Ergonomic:** Experience a quiet, sensitive, and comfortable typing experience that's significantly quieter than traditional keyboards. Focus on your work or study late into the night without disturbing others. The ultra-thin keys are stylish and easy to clean, providing comfortable feedback while keeping your workspace tidy, allowing you to enjoy moments of peace.
- **Plug and play:** Simply connect UNITEK SlimTap Ultra Light Wired keyboard to your computer or laptop via the USB-A port, and it's ready to use—no drivers or complicated settings required. The built-in 1.5m USB-A cable ensures a stable connection without length restrictions, giving you freedom in desktop placement.
- **Top-Raising design:** This ergonomic design helps maintain a neutral wrist position, reducing strain and injury risk while improving key visibility. Enjoy a comfortable typing experience that minimizes wrist fatigue for prolonged use.
- **Wake-Up Mode:** When your computer enters sleep mode, the keyboard does too. Press any key to wake up your computer, effectively reducing energy consumption and extending the keyboard's lifespan for a worry-free experience.
- **Blue LED lights status:** Caps Lock, Num Lock, and Scroll Lock are equipped with blue LED lights, clearly indicating their status to avoid input errors and enhance operational accuracy.
- **Wide compatibility:** Compatible with Windows 10/11, Linux, and macOS, offering broad adaptability for various systems.
