Sleep Mode	After 15 mins
Material/ Colour	PC Housing/ Space Grey

Description:

UNITEK SlimDuo 2.4G Wireless Keyboard and Mouse Combo features a slim design, silent typing experience, and practical functions, making it suitable for both office and entertainment scenarios. It provides a stable and efficient typing experience.

Product Features:

- 2.4GHz Wireless Connection Technology:** Utilizes advanced 2.4GHz wireless transmission for a stable signal and strong anti-interference capabilities with a range of up to 10 meters. The "plug and play" design allows easy setup—just connect the compact USB receiver to your computer or laptop for instant connectivity without drivers.
- Top-Raising Design:** The ergonomic keyboard design maintains a neutral wrist position, reducing strain and the risk of injury during extended use. It also enhances key visibility, offering a comfortable typing experience that minimizes wrist fatigue.
- High-Performance Optical Tracking:** The mouse features a 1600 DPI high-precision sensor for swift response and low latency. One-click DPI adjustment allows easy switching between 800 (LED flashes once), 1200 (flashes twice), and 1600 (flashes three times) DPI settings to meet various precision needs.
- Intelligent Power Management:** Powered by 1 AA battery for the mouse and 2 AAA batteries for the keyboard, it includes intelligent sleep technology that activates after 15 minutes of inactivity, conserving energy and extending battery life. Red LED indicators signal low battery levels for both devices.
- Wake-Up Mode:** Both the keyboard and computer enter sleep mode simultaneously. Press any key to wake them up, effectively reducing energy consumption and prolonging lifespan.
- Wide Compatibility:** No driver installation required. Supports Windows 10/11, Linux, and macOS.
