USB 10Gbps KVM Hub (U1344ABK)

Data Intercopy. Share 3 USB-A Ports for Enhanced Connectivity.

| | |
|-----------------|---|
| Dimensions | 123.5mm x 33.7mm x 11.8mm |
| Upstream | 1 x USB-A 10Gbps, 1 x USB-C 10Gbps with USB-A Adapter |
| Downstream | 3 x USB-A 10Gbps |
| KVM Control | A/B Host Switch |
| Cable Length | 80cm |
| Material/ Color | PVC Housing/ Black |

Description:

The UNITEK USB 10Gbps KVM Hub enables easy file transfer between two computers using a single mouse. Simply click on the file and drag it to copy* it from one computer to the other. Both computers can utilize the three USB-A ports, which allow connections for devices such as keyboards, mice, USB drives, and printers, all controlled by one host switch. This hub not only keeps your workspace tidy but also helps maximize productivity.

Product Features:

- Intercopy Data Between 2 Host Devices:** The upstream USB 10Gbps^ transmission interface features dual-host USB copy* and device sharing, allowing simultaneous use of downstream USB devices, such as keyboards, mice, and USB hard drives, across two computers. The product supports direct mouse drag-and-drop for effortless file transfer between hosts.
- Sharing 3 USB-A Ports:** Supports USB-A 10Gbps transmission and is compatible with USB 5Gbps. The downstream ports allow sharing between two hosts, enabling connections for USB drives, hard disks, keyboards, mice, and printers. Use the Host switch to remount devices if one host shuts down, ensuring continuous connectivity and preventing data interruptions.
- Wide Compatibility:** The device features one upstream USB-A port and one USB-C port (with a USB-A adapter), ensuring compatibility with a wide range of devices. With the GlinkAPP driver installed, file copying and device sharing support Windows to Windows, Windows to macOS, and macOS to macOS. Supported versions include Windows 8/8.1/10/11 and macOS 10.13 and above. This feature is suitable for users who utilize two hosts for tasks such as financial tax filing, engineering design, and more.

Note: This KVM hub does not support video output. It is designed solely for data transfer and control switching between multiple hosts.

^ Both host ports must be connected to USB 5 Gbps or higher for optimal performance.
An upstream connection of 480 Mbps cannot be used for the data intercopy function.
* To utilize the data intercopy feature, please install the driver from the UNITEK website.

Package Contents:

1 x USB 10Gbps KVM Hub; 1 x User Manual.

Pieces/ Carton:

20 pieces/ carton
